

# Software Report Sampler

time and attendance made simple

*Time & Labor Management Solutions*  
[www.timeamerica.com](http://www.timeamerica.com)

Time America has an automated solution for every size business.

By offering TA100 PRO and GENESIS PRO/SQL, Time America offers a complete line of powerful solutions that automate time and attendance, workforce scheduling, benefit administration, payroll processing, shop floor data collection, and the management of labor resources. All of our systems feed this information directly into your existing payroll package. Time America's systems offer upward compatibility, which means you can start with TA100 PRO, and upgrade to GENESIS PRO/SQL without re-keying data or losing history.

## Our Solutions (available reports show logo)

Time America's [GENESIS PRO/SQL](#) helps you optimize productivity and better manage your bottom line by automating not only your time and attendance but also job costing, benefit administration, employee review processing, access control, bell ringing and data collection needs. In addition, GENESIS PRO/SQL can produce valuable management reports that help control overpayment of employees and distribution of labor.

[TA100 PRO](#) was designed to be a simple to use, cost effective solution that automates all of your time and attendance needs. It is self-installing and no prior computer experience is needed to get the solution up and running. TA100 PRO automatically calculates employee time and wages using your specific payroll policies and provides valuable management tools. These management tools help control overpayment of employees and ensure proper distribution of labor costs at both the department and job level.

Easy to read,  
one line format

Breaks out overtime

The Department Summary Report summarizes the hours which have been applied to each "Department." The hours are broken out by their respective classes (Reg, OT1, OT2, OT3, and Unpaid).

"Departments" are a standard level of Labor Distribution. TA100 PRO and GENESIS PRO/SQL also include one additional standard level called Job. Each employee can be assigned to a home department job and then transfer to different departments and jobs throughout the day.

Different wages can be assigned to an employee for each department and job. With the addition of the GENESIS PRO/SQL Job Costing module, an employee can receive a different wage for working in a particular department, on a particular job, in a particular step, for a particular operation performing an individual task. The flexible Time America system allows you to change the names of department, job, step, operation, and task to match your company's terminology.

Breaks out time by user-selectable pay classifications

Indicates on what day the category was applied

Shows both hours and dollars

Used as the input to Payroll, the **Category Summary Report** breaks out the employee's hours into their respective pay class. In addition, the report also indicates on which day

the category occurred making it easy to spot trends. For example, the employee has taken five sick days all on Fridays or Mondays.

## Who's In/Not In Report

May be run for any day, time, and employee group/range

Ordered by: Code      Your Company Name      Tuesday 02/03/2008  
 Date: 01/14/2008      12:52:30  
 Time: 12:51:00      **WHO'S IN**      Page: 1

Actual punch time

Variance

Exception description

Scheduled punch time

User defined attendance code as reported on time card

The Attendance Report shows employees with attendance infractions. The employee's scheduled start and stop time are shown in comparison to their actual punches, along with the attendance code and a description of the infraction. Attendance Codes are user-defined codes that correspond

with transactions that fall within the defined time zones. For example, IL equals In Late and OE equals Out Early. GENESIS PRO/SQL allows the user to create an unlimited number of Codes to report on a wide range of attendance infractions.

\* Unlimited user defined attendance codes

\*\* IE, IR IG IL, OE, ID O R, OG, OL, OD

## Attendance Count Report

Flexible,  
user-defined  
reporting  
range

		Your Company Name		Thursday 02/05/2008

Number of  
occurrences  
during the  
selected period

User defined  
attendance  
codes as  
reported  
on the  
time card

Specifies  
both  
IN and OUT

Used for employee review purposes, the Attendance Count Report is similar to the Attendance Report except that it provides the user with a tally of the various Attendance Codes that have occurred within the selected date range

(i.e. the number of "IN LATE" infractions for the past month). This report also lists the number of absences with any date range the user selects.

<b>OCCURRENCES TOTAL</b>				<b>10.50</b>

Individual Occurrences

Rating Level

Point value for the occurrence

Great for employee reviews and tracking disciplinary action, the GENESIS PRO/SQL Occurrence Ratings Module maintains an occurrence history of all employee attendance infractions such as tardy, long lunch, early departure, etc. The system has user configurable tables that allow these infractions to be assigned a point value. You can then define employee attendance rating levels such as a warning, on notice, and mandatory termination.

This module rates employee's attendance versus company standards as well as other employees. When an employee reaches one of your predefined occurrence rating levels the system has the ability to issue an attendance notice (shown on the next page), including employee infraction history.

# Employee Attendance Notice Report

Easy to file document format

<b>Your Company Name</b>	02/02/2008
<b>EMPLOYEE ATTENDANCE NOTICE</b>	14:55

Code **00003**

Over budget hours/wages appear in parentheses

Totals by Job

Breaks out overtime hours/dollars

In GENESIS PRO/SQL, budgeted hours and wages are calculated from the daily costs you input

This valuable management tool compares budgeted hours and wages with those that were actually worked. In addition, this report also compares hours and wages based on scheduled work times. The Actual vs Budgeted report can show you the individual employee detail, so you can compare efficiencies of employees working on the same task. By breaking out time by regular, three

different overtimes, and any miscellaneous costs, the system gives you a concise illustration of where your time/dollars are being squandered. By using the Forecasting feature of the GENESIS PRO/SQL software, the system can be used to project budgets and anticipate cost overruns. This report can be run by pay period or any special time frame.

## Badge Generator Report

 <p>0006</p> <p>Murphey, Jennifer Marketing</p>  	 <p>0003</p> <p>Jones, David Mail Room</p>  
 <p>0008</p> <p>Johnson, Anita Vice President</p>  	 <p>0001</p> <p>Baines, Peter President</p>  

The GENESIS PRO/SQL integrated badge maker gives you the power to print barcode badges directly to a laser printer. The integrated report editor allows you to drop in your own corporate logo along with any additional formatting you desire.

Employee pictures are pulled directly from the employee's master record. In addition, GENESIS PRO/SQL prints job costing barcodes for transfer sheets.

1 Exception found

User defined ranges

Shows Variance

The Hours Exceptions Report allows you to easily flag employees with total hours that fall outside your pay policies acceptable range. Inside the employee's pay policy you define ranges for both daily and period hours. In addition, you can

also define a maximum number of consecutive hours (gross hours) an employee may be on-the-clock. If the employee's total hours fall outside the defined range they will be flagged on one of these reports. The report will also show the variance from your defined range.

# Job Costing Reports

TA100 PRO and GENESIS PRO/SQL come standard with the ability for employees to transfer between up to two levels of labor distribution (department, job). This is in addition to the ability to sort reports by division, group, full-time/part-time, temporary/permanent, hourly/ salaried. The GENESIS PRO/SQL optional Job Costing Module provides three additional labor distribution levels employees can transfer between (step, operation, task). Both systems have the ability to report on labor hours and dollars, actual and budgeted.

Employees may use a badge, keypad, optional bar code wand or gun to input job costing data directly at the data collection terminals. In addition, job costing data can be input through PC clock, Web Clock or Time America's Telepunch systems. The GENESIS PRO/SQL optional Job Costing Module allows you to define tables of valid transfer numbers through any of the data collection options. This prevents employees from transferring into invalid departments, jobs, steps, operations, or tasks.

Reports may contain up to eight user definable levels of totals including: shift, division, group, department, job, step, operation, and task. The Job Costing Module will also track quantities accepted and rejected and allows you to apply piece rates on quantities produced.

The forecasting option in TA100 PRO and GENESIS PRO/SQL allows you to immediately verify if you are on-schedule for the completion of any job. In addition, GENESIS PRO/SQL allows you to verify completion of any step, operation or task within the system. Forecasting takes into consideration the hours worked and dollars spent to date, along with the scheduled hours still to work, to come up with forecasted totals for any department, job, step, operation and task in the system. Combined with Budgeting, Forecasting can tell you if you will be over or under budget prior to the completion of a job. This allows you to adjust schedules to meet future requirements and avoid overpaying employees.

\* Job standard, step, operation, task available with the optional job costing module

\*\* Job only, does not include piece rates

## Job Cost List

5 Jobs listed									

Allows user to default a wage by job worked. Can be used to calculate overhead costs (overhead factor)

By using accepted and rejected quantities, piece rates can be calculated

The validation option validates any entered number and optionally displays the name. This virtually eliminates the possibility of mis-entered data

The Job Cost List is a detailed listing of all the job, step, operation, and task numbers entered into GENESIS PRO/SQL. This list contains information such as the job name and number, the active/inactive status of the job, the number of

budgeted hours and dollars, and wages assigned to the job. The list will also indicate whether or not the job number will appear in the validation table.

Breaks out up to 3 levels of overtime

Totals for each sort are shown along with grand total

The Labor Distribution Report summarizes total time by up to eight user selectable groupings of distribution (employee, shift, department, job, step, operation, task, and pay category).

In addition you can also select the hierarchy order in which you want the totals to be reported. The two reports shown represent two groupings (employee/job) sorted opposite ways.

\* Step, operation, and tasks available with optional Job Costing module

\*\* Department and Job only

Wages are broken out and calculated on up to 3 user-defined levels of overtime

Miscellaneous dollar expenditures are also reported

The Wage Distribution Report is similar to the Labor Distribution Report in that it summarizes total time by up to eight groupings of distribution. However, the Wage Distribution Report also shows dollars spent. Also, employees may have multiple wages per job or any user defined level.

The system allows you to change wages mid-pay period. In addition, you can also select the hierarchy order in which you want the totals to be reported. The two reports shown represent two groupings (employee/job and department/job).

## Actual vs. Budgeted Wage Report

\* Step, operation, and tasks available with optional Job Costing module

\*\* Department and Job only

Over budget hours appear in parentheses

Totals by department, job, step, operation, or task

Budgeted hours and wages are calculated from costs you input

This valuable management tool compares budgeted hours and wages with those that were actually worked. In addition, this report can also compare scheduled work times. The Actual vs Budgeted Wage Report can show you the individual employee detail, so you can compare the efficiency of employees working on the same task.

By breaking out time by regular and three different overtimes, the system gives you a concise illustration of where your time/dollars are being squandered. By using the Forecasting feature of the software, the system can be used to project budgets and anticipate cost overruns. This report can be run by pay period or over any special time frame.

Employees may have multiple piece routes per department, job, step, operation, or task.

Time spent to produce the accepted and rejected quantities

Total dollars earned per part are calculated

Rejected or scrap totals may be calculated

You pick the order you want to see the report sorted in. Up to 8 different user-defined sort criteria are available.

The Piece Wage Report assists in the calculation of piece work payroll. Quantity produced, accepted and rejected as well as total dollars earned by employee, job, step, operation,

or task. In addition, GENESIS PRO/SQL tracks rejected or scrap quantities that can be compared against good parts produced to report efficiencies.

\* Requires the Job Costing Module
